

Sustainable Computing for a Sustainable Future

Discover how we're advancing more sustainable computing

01:
Accelerating More Sustainable
Outcomes Across Industries

Using edge computing to help reduce
waste, emissions, and energy
consumption

02:
Network and Edge Solutions

Driving energy-efficient, intelligent,
virtualized networks that are both
carbon aware and carbon responsive

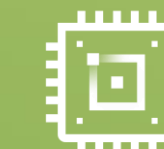

03:
Data Center Solutions

Continually improving TCO with data
center solutions

04:
Software

Optimizing utilization through
advancements in software, tools, and
services

05:
Hardware

Leading with innovations in energy
efficiency and product life cycle design

06:
PC Solutions

Empowering you to reduce your carbon
footprint across the entire PC life cycle

07:
Sustainable FABs

Leading the industry in sustainable
semiconductor manufacturing
