connecting you with technology™

## Making Spaces.

More and more districts are joining the Makerspace movement. For some, it's a cutting-edge space and for others it's taking library space and introducing Legos, robotics, or simple hands-on projects. Spectrum Industries has taken on their own initiative to make sure that the furniture you are using is helping you connect with that necessary technology. From whiteboard tables with power that help facilitate communication to storage and charging solutions that allows the technology to be ready when you need it, Spectrum is your partner in this Makerspace movement.

## Keeping it casual.

A relaxed student is a thinking student. Thinking students like to create, and a casual setting helps set the stage... Let Spectrum help MAKERYOURSPACE and keep your students creating with simple, casual, modular furniture. Students can casually engage with technology and each other as they collaborate around designated workstations or share their ideas straight from their devices at tech ready hubs. Casually talk to the Spectrum Sales Team, and make your space today.

The details are around the edges.

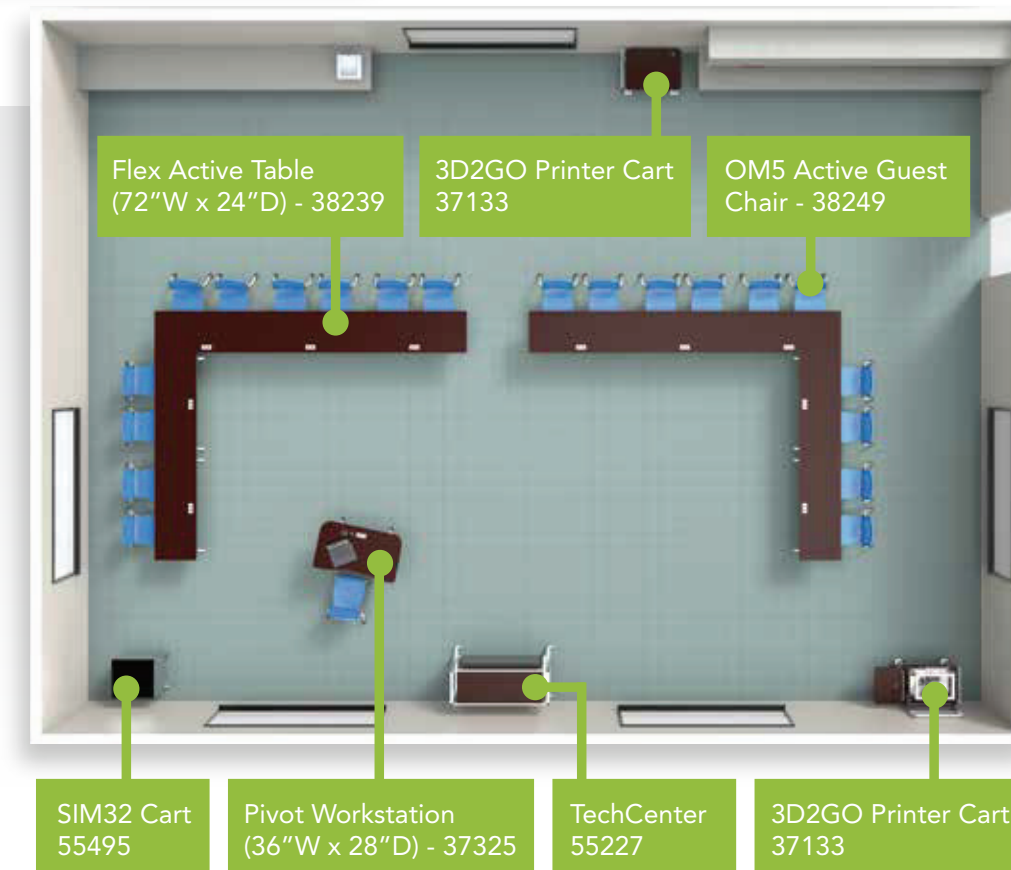

Surround your learning environment and make your space flow! Placing collaborative tables around the edge of the room allows for multiple interactive project workstations while allowing the mobile instructor to engage every student, everywhere in the room. Add in mobile device carts to your perimeter layout, and bring the required technology to the table. Talk to a sales team member today and let Spectrum MAKERYOURSPACE.

## Traditional Layouts

Rooted in Tradition.

Spectrum realizes that most Makerspaces will be integrated into traditional classrooms, but we also know traditions change. MAKERYOURSPACE into the most versatile classroom available with flexible tables, carts, lecterns, and presentation options that can quickly and easily be moved around the room to accommodate any pedagogy in any setting. From a traditional U-shape to rows, groups of tables to collaborative pods, Spectrum can take traditional to a new age.
