

BLUEFORCE BUNDLED SOLUTIONS: **BLUEFORCE MOBILE COMMAND POST**

Rapidly deployable, self-contained, and fully integrated tactical command kit for mobile incident command and crisis operations

It's today's technology built on 10 years of field experience executing counter-terrorism joint task forces. A kit that provides communications, sensor fusion, and a distributed common operating picture that crosses domains, agencies, and networks. More importantly, a kit that isn't confined to a single vehicle and can be moved in minutes with a space, weight, and power footprint that is military and civilian transport platform friendly. It's future proof in that it can interface with and extend today's sensors and services with tomorrow's. It's the kit that has supported counter-terrorism operations in New York City and Los Angeles, and border trafficking operations in California, Arizona, New Mexico, and Texas. Not to mention military operations for subterranean and CBRN/WMD missions.

Field Triage

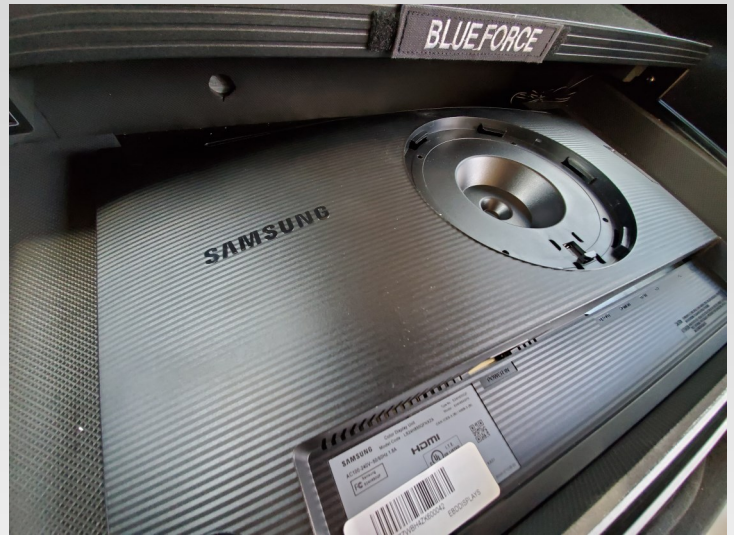

Disaster Response/COOP

Incident Management

Man portable, airline checkable, rapid command and control kit for emergency operations or business continuity of operations

SPACE	Hardened ATA-style flight case: 32" L x 20" W x 9" H
WEIGHT	46 lbs/21 Kg
POWER	12V/1500W inverter for all components
COMPUTE	Rugged Intel i7 with 16GB RAM, 256GB of SSD; Samsung DeX Dock
DISPLAY	Samsung Industrial Grade flat or curved screen monitor
COMMS	Cradlepoint IBR900 WIFI router w/LTE & DC-HSPA+ for Verizon, AT&T, or T-Mobile
VIDEO	Support for FIVE (5) ingest and publisher streams supporting RTMP or HLS
BLUEFORCE	BlueforceCOMMAND for Windows; BlueforceEDGE IoT Edge Gateway

Single Pane of Glass

People, sensors, drones, robotics, and AI as a "single pane of glass view" using simple drag and drop methods.

Information Sharing

Move information fast! Text and chat securely while sharing GIS, pictures, floor plans, and other collaborative data.

Autonomous Sensing

Blueforce provides access to autonomous sensors and services enabling access to drones, Kg video, and more.

Alerting

Distribution of system messages amongst humans, sensors, and autonomous agents, triggered by threshold, location, or rules.

Accountability

Blueforce command and mobile clients provide end-to-end accountability tools like PAR Check, Roll Call, and Evac.

Streaming Video

Supports up to 5 shared and secure video streams at the scene, but also can be made accessible to central/HQ command.

Field Gateway

Message queued interconnection of sensor networks with access to data from a disparate array of systems and sensors.

Secure

Blueforce products are rated TRL9 through use in active military ops and leverage NIST FIPS 140-2 certified crypto providers.
