

# Embrace the hybrid classroom

Create connected and collaborative learning environments with Microsoft Teams Rooms—a hybrid classroom solution.

## Seamlessly connect everyone

Connect students and educators through high-quality audio and video to make classrooms feel more natural and immersive.

## Support inclusive learning

Help remote learners feel as empowered to participate in classrooms as those in the room with live chat and reactions.

## Get ease of use and full control

Help educators support both in-class and virtual learners at the same time with one-touch join and an intuitive control console.

## Microsoft Teams Rooms devices provide:

-  HD video to see educators' facial expressions and body language from *anywhere* in the classroom.
-  Crisp audio to hear remote students and excellent voice pickup for clear class discussion.
-  Complete control over the virtual classroom, including one-touch join, and a robust, intuitive touchscreen console.
-  Increase engagement with Microsoft Teams features including live captions, raise hand, and screen sharing.
-  Share content from physical classroom whiteboards using the content camera or digital whiteboards through the Microsoft Whiteboard app.
-  Virtual classroom devices and hardware are secure, right out of the box.

With Teams Rooms in place, the options for engaging digital learners are endless. It's an investment in our future
