 Immersive Education

Teach for Tomorrow

Lenovo

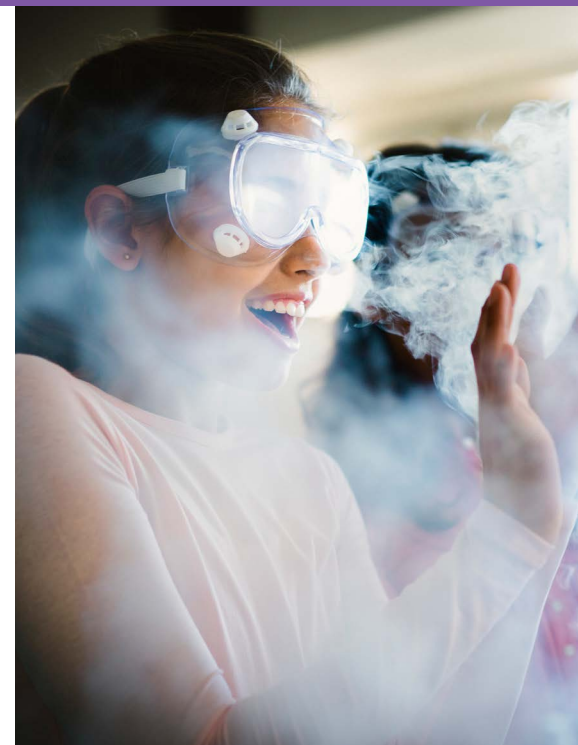

Lenovo Immersive Education transforms learning with the power of VR.

A changing world demands new ways of learning. Educate and equip the leaders of tomorrow with Lenovo Immersive Education, a complete educational VR solution that seamlessly integrates hardware, content, training, classroom management software, and support. With one straightforward platform, Lenovo's VR solution helps teachers deliver compelling, interactive educational experiences to K-12 or Higher-Ed students, no matter where they are located.

Learning that Lasts

Connect with students today and inspire them for tomorrow with Lenovo Immersive Education. Drawn in by engaging VR technology, VR learners of all ages gain significant increases in their knowledge retention, focus, confidence, and empathy over traditional learning methods. Educators enjoy an easy way to bridge educational gaps and boost student performance in a complex hybrid learning environment—with the flexibility to deploy custom content, manage the classroom, and control the fleet of devices from a single source.

- All-in-one solution for VR education, including training, classroom management software, and support
- Durable 4K VR headset with organizational-scale device design
- Enterprise-level security with IT staff control over full device fleet
- Multi-use flexibility allows teachers to launch multiple apps
- Flexible content options, including custom content

Effortless Education

Easy to deploy and easy to manage, Lenovo Immersive Education is thoughtfully designed to equip educators with a ready-to-use virtual reality solution that functions seamlessly from set-up to content planning to classroom management.
