

Enter a new Era of Digital Learning with Dell Devices Powered by Windows 11

The events of the past three years have affected every dimension of our lives, and education was hard-hit.

A Need for Innovation in Education

Recent studies show that, in a new era of blended learning, educators must accomplish more with less:

Despite massive shifts in the K-12 education space, the needs of students and faculty members haven't changed. Now, more than ever, they need tools to create and collaborate securely and at scale – whether they're at school or online.

Students Must

- ✓ Access technology that prepares them for the future
- ✓ Avoid distracting tech and focus on learning
- ✓ Communicate and collaborate with classmates at school or online

Teachers Must

- ✓ Personalize learning for students of all abilities & learning styles
- ✓ Enable learning and engagement from almost anywhere
- ✓ Maximize class time for instruction & minimize troubleshooting

Administrators Must

- ✓ Promote equitable access to digital learning for all children
- ✓ Offer devices to all students to advance learning
- ✓ Balance tight public-sector or independent school tech budgets

IT Teams Must

- ✓ Manage and deploy faculty and student devices remotely
- ✓ Safeguard student and teacher data and identities
- ✓ Protect school data and devices
