# Your powerful, easy-to-use device, designed just for teachers.

Unlock generative AI features made to meet the needs of teachers with advanced-use Chromebook Plus.

Powerful devices for the whole school day
Boost teaching with 2x power, memory, and storage, full HD 1080 display, and Google AI.

Drive productivity in and out of class
Make hard work feel easier with AI features made for the way you teach.

Flex to fit your personal teaching style
Take notes on a touchscreen, record lectures, or start with a six-second boot time.
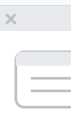

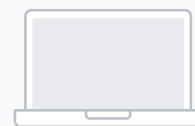

Simplify for a more cohesive classroom
Keep teachers and students on the same page with one operating system.

With Chromebook Plus:

Enhance teacher time management with **42** hours saved per teacher annually

Improve student time on task by **18** hours per student each school year

Save money with **33%** fewer students requiring additional accessibility tools

"

Teachers like the fact that Chromebooks don't waste valuable instructional time. Teachers don't have to wait for laptops to boot up or to download software, which means they can use every minute to teach students.

chromebookplus

Chromebook Plus is a different type of computer

What sets them apart is ChromeOS, the operating system that uses cloud-based technology for automatic background updates, as well as built-in generative AI features, changing the way we teach and learn in a new era.

Fully customizable

- Optimize video conferencing, web browsing, and multi-tasking with the right level of computing power
- Allow for more flexible instruction with built-in apps, like Screencast to record your lessons, and cast moderator to wirelessly share your screen
- Select from various models, including convertibles, slates, and detachable keyboards, and features like touch screen, stylus, HD display, and webcam
- Read PDFs aloud with AI, and use built-in accessibility features for physical and cognitive learning disabilities

Powerfully simple

- Elevate your writing with a Google AI-powered assistant to inspire or help polish your words
- Create voice recordings and audio content with built-in AI-powered voice recording
- Edit, share, and store your files and recorded lessons securely in the cloud, without worrying about running out of storage
- Stay more organized with virtual desktops to keep different work streams separate, such as school and personal tasks

Fast and reliable

- Teach from anywhere with lightning-fast boot-up times, rapid charging, and a long battery life
- Support sustainable practices with longer device lifespans, extended OS support, and easy repairability
- Safely start using devices right out of the box with built-in security
- Work on documents even without an internet connection using offline mode and File sync
- Keep your device powered longer with adaptive charging, which uses AI to predict usage patterns
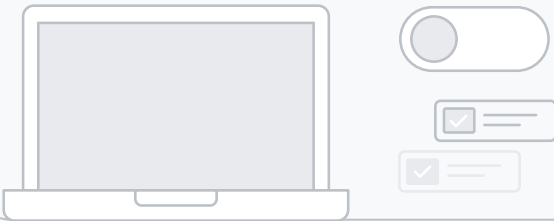

There have been **zero successful** ransomware attacks on any ChromeOS device, ever – and Chromebooks have never had a virus.

> ❝ [Chromebooks] made a massive difference in lessons. Teachers work hard. Students work hard. For me, it's not about revolutions in teaching, it's just about making things really simple.
