Alternative Care Facilities

COVID-19 Pandemic Response

Zebra Optimizes COVID-19 Alternative-Care Facilities By:

- Replicating critical workflows used in standard, acute-treatment medical facilities
- Scaling these workflows in alternative-care facilities

TC5X-HC   ZD510-HC & Cartridges

Patient Admissions

Scan identification (ID)
for instant data capture

Print wristband for positive
patient identification (PPID)

TC52-HC   Workforce Connect

Ongoing Clinical Collaboration

Access patient
information in real-time

Connect staff for
ongoing communication

Proven Solutions for Alternative Care Facility Workflows

Zebra solutions are proven
force multiplier technologies
to safely and quickly scale
standard acute-care
workflows for alternative
care facilities

ZD410-HC   TC5X-HC

Mobile Specimen Collection

Collect specimen sample
and connect to PPID

Print barcode ID specimen labels
for tracking and accuracy

TC5X-HC   DS8100-HC

Barcode Medication Administration (BCMA)

Scan wristband and medication
to reduce medication errors,
enhance patient safety

Confirm in the
Electronic Health Record (EHR)

Admission to Discharge: Optimizing Safety, Speed & Accuracy of Alternative Care Facilities

Fast
- Immediate data capture reduces bottlenecks, streamline workflows
- Solutions not dependent upon Wi-Fi or real-time internet connectivity

Accurate
- ID and wristband scans reduce manual-entry errors, increase accuracy and PPID
- Enable ongoing, real-time clinical collaboration and data information flow with EHR

Safe & Compliant
- ID and wristband scans enable care continuity without removing Personal Protective Equipment (PPE)
- Solutions feature disinfectant-ready housing for continual cleaning with disinfectant wipe downs
