WatchGuard®

Advanced Network Security

Whether you have a single location or thousands of sites around the world, WatchGuard has a solution that is right for your environment.

A FIREBOX FOR EVERY OCCASION

- Our tabletop Firebox appliances offer small form factor, high performance, and total security with optional built-in Wi-Fi capabilities.

- 1U rackmount Firebox appliances enable total security with screaming fast performance ideal for midmarket and distributed enterprise organizations.

- Cloud and Virtual firewalls extend our same comprehensive suite of defenses into virtual infrastructures.

A SECURITY SERVICE FOR EVERY THREAT

WatchGuard offers the most comprehensive portfolio of security services in the industry to protect against evolving malware, ransomware, and data breaches. Each security service is delivered as an integrated solution within a Firebox appliance.

**Not available on Firebox T15/T15-W, T20/T20-W, or T35-R.

Multi-Factor Authentication

Does multi-factor authentication built with small and midsize organizations in mind sound too good to be true? With WatchGuard AuthPoint it's possible!

AUTHENTICATION FROM THE CLOUD

No need to install software, schedule upgrades or manage patches. AuthPoint service is delivered on the WatchGuard Cloud platform and is available from wherever you are.

3RD PARTY INTEGRATIONS

WatchGuard's AuthPoint service includes support for dozens of 3rd party integrations, and even more to come from our strong and growing ecosystem – so that you can add MFA protection to all your valuable resources.

MOBILE DEVICE DNA

Because of a unique feature only available with AuthPoint, mobile devices have their own DNA associated only with your account. Any other mobile device attempting to authenticate as the user will be rejected.

EASY-TO-USE MOBILE APP

The AuthPoint app enables you to authenticate from your smartphone with speedy push-based authentication as well as offline authentication using QR codes.

AFFORDABLE LICENSING PER USER – REALLY!

AuthPoint is licensed on a truly per-user model – one license per user to support all of their devices.

Secure Wi-Fi Cloud

Providing secure wireless access to your students and employees doesn't have to be complicated. WatchGuard Wi-Fi solutions provide secure, scalable and easy-to-manage wireless access.

WIRELESS INTRUSION PREVENTION SYSTEM

Leveraging patented technology, our WIPS provides the most reliable, rock-solid security in the industry with the lowest false positive rate.

TRUSTED ANALYTICS

Know how, where and when students, staff, and visitors are using your Wi-Fi to maximize your investment and ensure an optimal experience for users. Metrics include footfall, dwell time, conversion and more!

SECURE ENGAGEMENT

Optimize your outreach with a suite of easy-to-use, built-in tools that turn a simple wireless connectivity offering into a rich Wi-Fi experience for students, guests and employees.

MANAGEMENT THAT SCALES

Only platform to scale from one to unlimited access points, with no infrastructure.

PACKAGED TO MEET YOUR NEEDS

Whether you're looking to protect your wireless network from attack, collect analytics on usage, simply provide wireless access, or all of the above – WatchGuard has the right Wi-Fi package for you!

Endpoint Security

A single compromised endpoint can give cyber criminals access to your entire network, essentially making each endpoint a perimeter in itself. WatchGuard DNSWatchGO provides persistent, always-on protection, no matter where the endpoint is located.

PROTECTION ON THE GO

DNSWatchGO monitors and correlates DNS traffic against our intelligence feeds, identifying and blocking connections to malicious domains.

OFF-NETWORK VISIBILITY AND ENFORCEMENT

Leverage instant visibility and control over web activity occurring on devices inside and outside of your network, allowing you to enforce web policies to keep users away from dangerous sites.

AUTOMATED TRAINING

When an end user clicks on an email or link that DNSWatchGo has identified as a phishing attempt, they are redirected to an interactive video that educates on the warning signs of a phishing attack.

LOW TCO CLOUD SERVICE

As a 100% Cloud-based solution, DNSWatchGO is easy to deploy and manage, saving you time and money.

WatchGuard

- Founded in 1996
- Headquarters: Seattle, WA
- 5 operations centers and direct presence in 19 countries
- 700+ Employees

ENTERPRISE-GRADE SECURITY

Businesses of all sizes should have access to the most effective security technologies. WatchGuard's platforms enable customers to leverage best-in-class security providing a layered defense against today's evolving threats.

Advanced Network and Endpoint Security
Industry-leading security services that protect your business, employees, and reputation from today's greatest threats – on and off your network.

Multi-Factor Authentication
For far too long, multi-factor authentication has been out of reach for small and midmarket businesses. Our solution provides this security necessity to that under-served market.

Secure, Cloud-Managed Wi-Fi
Providing Wi-Fi to your customers and employees is part of business today. Unlock the full potential of your wireless solution with WatchGuard Secure Wi-Fi, with powerful WIPS, and analytics and engagement tools.

VISIBILITY AND MANAGEMENT

When it comes to network security, seeing is knowing, and knowing leads to action. WatchGuard solutions provide the visibility you need to effectively protect your business.

Cloud or On-Premises Visibility
Both our on-prem and Cloud-managed visibility solutions provide a suite of tools to instantly identify and distill key security threats, issues, and trends.

WatchGuard Wi-Fi Cloud
Enjoy a completely controller-less Wi-Fi management experience including set-up and configuration, monitoring, troubleshooting, and visibility into Wi-Fi network health.

WatchGuard Cloud
Multi-tier, multi-tenant platform that enables you to protect your business better and faster, with less time and cost.

SIMPLIFICATION

Securing your organization doesn't have to be complicated. WatchGuard builds simplicity into everything we do. From deployment to management to reporting, see how easy security can be with WatchGuard.

Simplified Packaging
All of our platforms offer purchasing options designed around how you do business. From Total Security Suite to Total Wi-Fi, we make it easy to purchase the security you need.

Quick and Simple Deployment
WatchGuard RapidDeploy is a powerful, Cloud-based deployment and configuration tool that comes standard with WatchGuard Firebox appliances. All you have to do is power up the appliance and connect it to the Internet.

Best-in-Class Support
Year after year, WatchGuard support is rated one of the best in the industry. Our team is dedicated to providing the support your need when you need it.

24x7

"It's about having the outright capability, flexibility, and scalability WatchGuard provides. Whatever problem you're trying to solve, whatever challenge you're up against, you'll do it with WatchGuard."

- Andrew Evers, Head of IT, Reconomy

THE WATCHGUARD PARTNER ECOSYSTEM

RESELLERS AND MSSPS
WatchGuard has built extensive relationships with trusted resellers and managed security service providers around the world. Whatever type of partner you're looking for, wherever you are, we're confident we can find the right partner for you.

TECHNOLOGY PARTNERS
