What is DMS?

Device Management Solutions (DMS) provide centralized, remote management of interactive whiteboard displays to seamlessly deliver engaging educational experiences to students and staff. Available as an on-premise or cloud-based solution, DMS helps school districts optimize and secure displays across classrooms and buildings, regardless of their operational requirements.

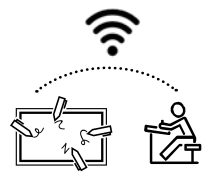

Device Management Solution to remotely manage Interactive Displays from multiple classrooms/schools at any time, at any place.

Application Management

Device Management

Monitor and Support

Essential DMS features

Remote Application Management

Install, update, disable, or delete applications remotely to ensure a consistent user experience and monitor compliance with district application usage policies.

Remote Screen Control

Perform technical support tasks and assist users from anywhere using a real-time view of the screen and remote keyboard and mouse control.

Emergency Messaging

Communicate important information to students and staff with advanced messaging capabilities that efficiently deliver notifications directly to classroom whiteboards.
