

POLY FOR HIGHER EDUCATION

# 3 WAYS TO SET UP TEACHERS (AND STUDENTS) FOR SUCCESS

Professors and students in colleges and universities today expect a Hybrid-Flexible (HyFlex) learning environment. They want the option of attending sessions in the classroom, teaching online, or doing both. Poly's here to help.

**1** **Provide the tools they need**  
Distance learning is here to stay. For those who teach from home (and possibly share a space with others), easy-to-use, state-of-the-art headsets and conferencing equipment are must-haves—and need to work seamlessly with their favorite platforms. Poly offers a full line of options to fit every budget.

**2** **Facilitate real, human connections**  
Learning is easier when teachers and students look and sound their best. On calls and in classrooms, Poly brings everything to life with high-definition video and clear, crisp audio. Even beyond the classroom, everything will sound amazing, too—think video, podcasts, and music.

**3** **Put the focus on teaching, not the tech**  
Instructors, while teaching, tend to move freely about the room. Poly's video solutions let students keep an eye on them, with speaker-tracking technology. It's a worry-free feature that allows natural presentations and helps teachers make students their priority.

## How to earn an A+ Empower educators to deliver exceptional learning experiences.

Poly creates premium audio and video products so your higher-education organization can have the best experiences possible—anywhere, anytime, every time. Our headsets, video and audio-conferencing products, desk phones, analytics software, and services are designed and engineered to connect educators, administrators, and students with incredible clarity.

Ready to help educators navigate the next normal?  
We're here to help.
