

# Make Your Workspace Work for You

Our work-from-anywhere solutions power, protect and connect office equipment to help you thrive – wherever it is that you make your desk.

Check out our solutions designed specifically for the home workspace:

## Home Office UPS Systems

Reliable UPS battery backup keeps desktop PCs, routers and other components operating through blackouts and other power problems.

## Monitor Mounts

Maximize desk space and improve ergonomics. Choose from full-motion, tilt and swivel styles.

## USB Docks

Transform your laptop into a dynamic workstation with a variety of ports, including AV, USB and Ethernet.

## Webcams

Participate in video calls with a 1080p webcam with built-in microphone. Noise reduction enhances sound quality.

## Cables & Adapters

Connect devices with network, AV, digital signage or power cables and adapters.

## Power Strips & Surge Protectors

Multiple outlets distribute power to home office equipment. Surge protectors safeguard electronics from power surges.

## Charging Stations

Charge multiple USB devices when AC outlets are not available or convenient.

## Laptop Stand with USB-C Hub

Folding stand has a hub that connects to a laptop's USB-C port to create a portable workstation with four USB-A ports and USB-C PD charging.
