

Businesses need a smarter PC solution. So Intel created one.

Intel vPro[®] Essentials is built for business.

The all-new Intel vPro[®] Essentials platform provides built-in value with business-class performance, hardware-based security and elevated connections.

Processing power for where you need it most.

Running a business demands multitasking to the extreme. The Intel vPro[®] Essentials platform is a revolutionary design that scales up performance with the more that you do and gives a boost to the most demanding workloads.

Layers of security for additional peace of mind.

Hardware-based security helps identify early indicators of attacks that software-only solutions could miss. This built-in solution brings value right out of the box without special set up and is designed to limit impact to processor performance.

Collaborate with confidence.

Optimized for real-world business use with high-speed file sharing, ultra-responsive applications, and great work-from-anywhere experiences from enhanced connectivity.

- Nearly 3x faster wireless connectivity with Intel[®] Wi-Fi 6/6E (Gig+)¹
- Thunderbolt[™] 4, at 40 Gbps, delivers the best—the fastest, simplest and most reliable-cable solution.²

Streamline PC management.

Hardware-based remote management helps you ensure the continuity of your business by giving you more visibility and control of distributed employee devices.

- Centrally manage all devices in a secure manner, whether on premises or remote
- Monitor and patch employee devices through the cloud – over wired and wireless (Wi-Fi), even when the OS is down³

Contact an Account Manager today for more information on Intel vPro® Essentials.

1 Versus standard Wi-Fi. Subject to router requirements and available signal. Details at www.intel.com/PerformanceIndex (Connectivity).

2 As compared to other current PC Client bidirectional I/O connection technologies like eSATA and USB. Must be connected via Thunderbolt 3 or newer accessory to enable full performance. See www.intel.com/PerformanceIndex (connectivity) for details.

3 Intel® AMT requires a network connection; must be a known network for Wi-Fi out-of-band management. Learn more at www.intel.com/PerformanceIndex (security & manageability).

Intel technologies may require enabled hardware, software or service activation. Performance varies by use, configuration and other factors. Learn more at www.intel.com/PerformanceIndex.

No product or component can be absolutely secure. Your costs and results may vary.
