

Secure every access point with one simple solution.

More devices, applications, networks and users increase the complexity of managing – and protecting – user access in your business. While employees just want to work efficiently, IT needs to ensure the proper controls are in place to protect the company.

For more than 47,000 businesses of all sizes, LastPass Enterprise reduces friction for employees while increasing control and visibility for IT with an access solution that's easy to manage and effortless to use. With single sign-on for IT's top-priority apps, and password management to capture and secure everything else, LastPass Enterprise protects every access point and conveniently connects employees to their work.

Centralized, secure access

With an integrated single sign-on and password manager solution, LastPass Enterprise provides control for every access point. IT can leverage 100+ custom policies, automated user management, security reporting and more to safeguard every password-protected entry point, while simplifying everyday access.

Frictionless employee experience

Keep things simple with one place to store and access every tool. Employees know exactly where to go – there's no jumping between solutions. With LastPass Enterprise, employees have simple access to IT-supported apps through single sign-on and can store all other apps in their password vault. LastPass Enterprise

does the work of connecting to every app and creating, remembering and filling in passwords, so employees can focus on the real work.

Convenient password sharing

LastPass Enterprise provides secure, flexible sharing for collaborative teams – from IT to marketing groups – while maintaining accountability, using generated passwords and revoking access in real time to ensure company data doesn't leave with departing employees.

Comprehensive security controls

From 100 customizable security policies to detailed reporting logs, the admin dashboard is IT's command central for deploying LastPass Enterprise company-wide and securing user access across the organization.

The admin dashboard offers a holistic view of user access across your organization.

Plug-and-play integrations for IT teams

Through scalable, automated integrations with your user directory of choice, LastPass Enterprise simplifies employee onboarding and offboarding for IT teams. LastPass Enterprise offers seamless integrations for Microsoft Active Directory, Microsoft Azure AD, OneLogin and Okta.

Single sign-on and password management

Comprehensive security controls

Flexible integrations

Easy user management and reporting

High adoption, fast results

LastPass Enterprise is not only easy to set up and maintain, but self-guided resources also help admins with rollout and employee communications so businesses can achieve better results with no extra services required.

Designed for security first

We're uncompromising when it comes to data security. User data is encrypted and decrypted at the device level so that the master password – and the sensitive data stored in LastPass Enterprise – are kept secret, even from us. Plus, you can augment security for LastPass accounts with multifactor authentication.

These features deliver the control IT needs and the convenience users expect:

Central admin control

The admin dashboard offers automated user management, policies and more that busy IT admins need.

Single sign-on

With a catalog of 1200+ pre-integrated apps, it's simple for IT to make critical business tools accessible to employees in one convenient portal.

Universal password management

Simplify access to all apps as well as generate and automatically capture, store and fill credentials for any login.

User directory integrations

Automate onboarding and offboarding, group management and more with AD, Azure AD, Okta, OneLogin or a custom API.

100+ security policies

Enforce best practices and control password behavior across the business.

Detailed security reports

Tie actions to individuals with automated, detailed reporting that helps your business maintain compliance.

Secure password sharing

Give teams a flexible, safe way to share access to apps without sacrificing accountability or security.
