

DIGITAL WORKSPACE SOLUTIONS

How Businesses Are Increasingly Leveraging AI

Organizations that embrace AI are unleashing creativity at all levels, ushering in a new wave of productivity.

AI is Creating Massive Value

\$10 trillion

nearly will be added to global GDP in 10 years¹

\$3.50

is the average return for every \$1 spent on AI¹

70%

of employees say AI makes them more productive¹

71%

of companies are already using AI¹

56%

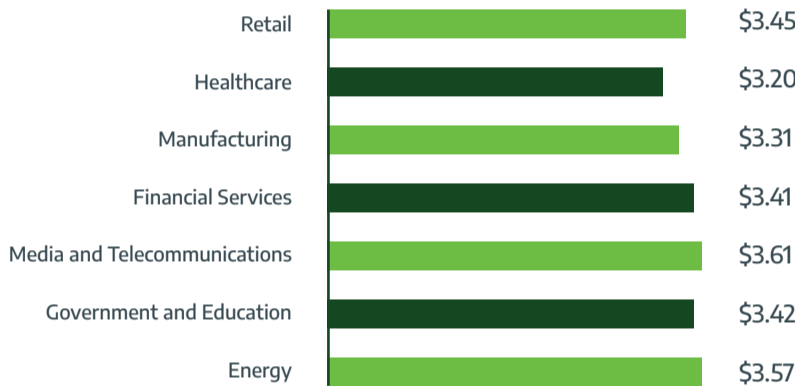

of companies are using AI to improve their business operations³

Nearly 2 in 3 people (64%) lack the time and energy to do their jobs well due to digital debt.²

AI is poised to change that.

ROI for Every Dollar Spent

AI can quickly process vast volumes of data, schedule appointments, manage inventory, and create personalized experiences, automating and optimizing thousands of tasks.¹

Deployment Times in Months

Companies are discovering that AI developments can be fast. Many implementations take **less than 3 months**.¹

Most Common Use Cases for AI

AI improves thousands of processes in hundreds of verticals, offering and optimizing:¹

- Business Assistants
- IT Automation
- Business Processes and Workflows
- Software Development
- Product and Service Innovation
- Fraud Detection and Cybersecurity
- Copywriting
- Running Simulations
- Personalized Customer Engagement
- Analytics
- Training

Developers are creating dedicated AI apps for thousands of use cases, with well over an estimated 100,000 AI tools so far, and 170 million next-gen AI smartphones forecast for 2024.⁴

The Biggest Barrier to AI?

52%

of business leaders say a lack of skilled workers is their #1 challenge in implementing AI¹
