N-ABLE™

N-able Passportal +
Documentation Manager

Centralized IT Documentation Solution

Improve efficiency and customer experience with our new document management solution. Standardize your documentation and work conveniently with linked documents, articles, and passwords all in one place.

- Unlimited documentation
- Per-document access control
- Standard built-in templates
- Audit history
- Interface branding
- Free-form article editor
- Integrated access with password management
- Relationship mapping of credentials, articles, and files
- Convenient drag-and-drop bulk file upload
- File version control
- Streamlined client incident resolution

Standardize your client documentation and allow your technicians to work more efficiently with linked documents, articles, and passwords in a single platform.

- **Problem:** No centralized document management and no standardization.
- **Solution:** Document management built for security; access control fully integrated with password management and automation.
- **Outcome:** Save time, money, and frustration while maintaining consistent service delivery.
