

POLY UNIFIED COMMUNICATIONS PORTFOLIO FOR MICROSOFT

Poly Unified Communications audio devices are certified for Microsoft Teams. Teams certified products have a designated Teams button to bring the Teams desktop app to the foreground, while Skype for Business certified headsets have been upgraded to Microsoft Teams certified via a firmware update. Poly provides a connected experience transforming every Microsoft communication into an interaction that is more collaborative, engaging, and accessible from anywhere.

1. Features adaptive power, which optimizes for range and talk time to save battery life and maximize density.

2. Performance depends on battery type and may vary by device.

3. For full list of available models, please visit www.connection.com

4. When used with BT700 USB adapter

5. Unlimited talk time with deluxe charging cradle kit, comes standard with Savi 8245 office and UC Series. Available as an accessory with 8240 Office and UC Series.

Gold Communications

TECHNOLOGY LEGEND**A2DP**

A Bluetooth profile that allows high-quality audio content to be streamed from one device to another. Listen to streaming media, music, and navigation through your headset.

Active Noise Canceling (ANC)

Technology that reverses surrounding sound waves to cancel low-frequency noise in order to isolate and minimize ambient noise the user can hear.

Acoustic Fence

Technology that uses a noise canceling microphone and an additional omnidirectional microphone to block out background noise.

Adaptive Power

Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximize density.

Advanced (Digital) Hybrid Active Noise Canceling

Uses four microphones and three ANC settings (off/mid/high) for greater background noise reduction compared to standard ANC.

Close Conversation Limiting

Technology that optimizes your voice, while minimizing nearby background noise.

Digital Signal Processing (DSP)

Mathematical manipulation of an information signal to actively reduce background noise for improved sound quality, including equalization, acoustic echo cancellation, noise reduction, and audio leveling.

Dynamic EQ

Optimizes voice quality on calls and automatically adjusts EQ settings when listening to music or for multimedia playback.

Hi-Fi Stereo

Full-range, dual-channel audio playback capable of frequencies from 20 to more than 20,000 Hz.

Immersive Audio

Specially designed ear cushions and headband reduce background noise for increased clarity and comfort.

Microsoft Teams Certified

For devices to be certified, they need to meet Microsoft's audio requirements to ensure users get the best audio experience, they also must include a dedicated Teams button to instantly bring to the foreground Microsoft Teams for streamlined communications.

Smart Sensor Technology

Built-in sensors deliver automatic functionality, such as answering a call by placing the headset on and automatically transferring calls between smartphone and headset.

SoundGuard

Acoustic limiting for protection against sounds exceeding 118 dBA per Telecom Industry Standards.

SoundGuard DIGITAL

All the benefits of SoundGuard plus anti-startle protection, which detects and eliminates sudden increases in sound, and time-weighted average (TWA) control, which prevents average daily sound exposure from exceeding 85 dBA.

Wideband

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
