

Re-energize your fleet with a modern OS.

ChromeOS Flex is the fast and secure upgrade for your school's existing Macs and PCs.

Everyone benefits from a cloud-based operating system.

IT Admins can transform existing devices with a modern OS

- Unify new and existing devices with one simple, powerful cloud-based management system.
- Configure device policies, control user access, and manage apps remotely with the Chrome Education Upgrade.
- Quickly install ChromeOS Flex and download profiles automatically.
- Reduce risks with ChromeOS- the most secure OS out of the box, which has never had a successful reported ransomware attack.

Students and educators can get started in minutes

- Simplify the user experience with a unified, intuitive interface across all devices.
- Boot up devices faster, so they're ready when class begins.
- Individual user profiles enable easy login across devices and offline capabilities.
- Keep learning going with automatic security updates that happen in the background- so devices are always protected.

How it works

01

Try ChromeOS Flex from a bootable USB drive.

02

When you're ready, install ChromeOS Flex on an existing PC or Mac.

03

Deploy ChromeOS Flex to more devices in your school through a USB drive or network deployment.

ChromeOS Flex can help extend the life of your devices to **up to 13 years**.

That's **2-3 times longer** than the lifespan of a typical laptop.¹

¹Business News Daily

ChromeOS Flex powers a cost-effective, easy-to-manage, sustainable, and secure learning environment.

Make the most of your existing fleet.

- All your devices – PCs or Macs – can run on ChromeOS Flex for a unified teaching and learning experience.
- Download ChromeOS Flex at no cost to extend the life of your devices. And add Chrome Education Upgrade to easily manage your fleet at scale.
- Background updates happen automatically, so there’s less maintenance for IT staff and more time for other technology initiatives.

ChromeOS Flex saves you the cost of buying all new devices for your school.

Gartner predicts **PC prices will increase in 2024** due to component price hikes.²

²Gartner, 2024

More than **62 million tons** of e-waste was discarded worldwide in 2022, which outweighs the Great Wall of China.³

³United Nations, 2024

Enhance your sustainability efforts.

- Reduce e-waste by extending the life of your existing Macs and PCs with a modern OS.
- Devices that run ChromeOS Flex consume 19% less energy.⁴
- Run devices on the cleanest cloud in the industry – 100% renewable energy since 2017.

⁴Google Cloud Blog, 2024

Reduce risks with proactive security.

- Stay ahead of digital threats – devices update automatically with 24/7 monitoring, 256-bit encryption, and alerts.
- Reduce risks with ChromeOS, the most secure OS out of the box, which has never had a successful reported ransomware attack.
- Add Chrome Education Upgrade for advanced security features and visibility.

Education institutions are the **#1 targeted industry** by cybercriminals.⁵
