YOUR NEW DEVICES, READY ON DAY ONE

Your Partner for Innovation in the Classroom

Windows 11

The face of education has changed drastically in the last two years. As a result, many schools are reevaluating their technology needs to ensure students, staff, and IT teams have the right devices to keep secure, connected, and productive. Low-cost devices featuring Windows 11 or Windows 11 SE for Education are built with your needs in mind and offer the flexibility that keeps users on the right track for years to come.

However, one facet schools sometimes don't consider is the deployment and enrollment of a new device ecosystem. Without an expert at your side who understands the nuances of the entire picture, you could increase cost and frustration while decreasing user satisfaction. Don't go it alone—you already have enough to worry about. Let Connection help you make the most of this school year and beyond by ensuring your next device rollout is a seamless success.

Connection Services

Through our long-lasting customer relationships with Microsoft, we're continually improving the way we offer and support Windows devices and services. Our breadth of Microsoft knowledge and expertise can help you secure your users digital future. We offer:

- Networking and Wireless Infrastructure

Windows 11

Technology Integration and Distribution Center (TIDC)

Built from the ground up to simplify your technology lifecycle, the TIDC offers everything you need to integrate technology into your school seamlessly and affordably. Optimize user experience with custom configuration services, convenient deployment options, and advanced inventory planning and rollout management—all backed by exceptional customer service and support:

- Provisioning and Imaging
- Deployment Hosting
- Remote Management
- Location in a Box
- Inventory Planning and Rollout

Windows Autopilot

A zero-touch deployment strategy provides an out-of-the-box experience to give your students, staff, and IT teams peace of mind, while reducing your workload. Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use.

Connection can help you seamlessly move to Windows Autopilot. From modern deployment to a full white glove service, we can:

- Get you ready for modern deployment by assessing your current software and your cloud readiness
- Register your newly purchased devices, so you can deploy them remotely with Windows Autopilot, before they even arrive at your door
- Walk you through the entire journey from cloud ready to zero-touch deployment of 250+ device
