

Modern Microsoft Collaboration Services

Connection offers a variety of professional services across all SharePoint versions and platforms, including on-premises, online, and hybrid deployments. Our professional services help your organization leverage modern Microsoft collaboration platforms, such as SharePoint Server, SharePoint Online, and Microsoft Teams. We are your Collaboration experts for all facets of consulting—including planning, installation, architecture, design, analysis, project management, integration, and support. We offer two flexible options: fixed-fee project-based and time-and-materials-based services.

Advisory Services

Connection's Microsoft Modern Collaboration Advisory Services ensure your SharePoint environment is healthy, cloud-compatible, and scalable to meet the long-term needs of your organization and ensure it's designed with a modern approach to guarantee success. If your SharePoint solution shows early signs of trouble, don't ignore them. Even minor issues can cause stagnation.

To help you assess the efficiency of your SharePoint implementation, Connection offers advisory services. We analyze your current SharePoint infrastructure, architecture, and performance to determine if and what remediation is recommended to foster future cloud compatibility and performance improvements.

Design Services

Connection's Microsoft Modern Collaboration Design Services assist companies with all aspects of a successful SharePoint implementation and/or migration. These services include designing the base SharePoint Architecture and content on which the organization's intranet, department sites will be built, as well as where the Microsoft Teams sites will be based. Here are key focus areas of a solid design:

- Hierarchical Site Structure vs. Flat Hub Sites Structure
- Content Types, Site Columns, and Managed Metadata
- Governance
- Information Architecture
- Taxonomies and Term Store
- Navigation and Search
- Lists and Document Libraries
- Office 365 Groups, Modern Teams, and Communication Sites
- Mobile Experience with Modern Sites
- Microsoft Teams Requirements for Integration with SharePoint
- Security and Permissions

Modern SharePoint Solutions

Microsoft SharePoint is the leading platform for delivering solutions to optimize collaboration and enhance employee productivity. Connection can help you implement solutions for collaboration and information sharing, document management, and more. We can deliver the following solutions, using SharePoint as the foundation:

- Intranet Portals
- Microsoft Teams
- Knowledge Base
- Document Management
- Project Management
- Records Management
- Contract and Client Accounts Management

Deployment and Migration Services

Connection offers the following Microsoft Modern Collaboration Deployment and Migration Services:

• Greenfield Deployment, Migration, or Upgrade to SharePoint's Latest Server versions

Whether you're deploying new solutions, migrating, or upgrading to the latest server versions, Connection offers services with the correct level of planning. We base this planning on a best practice approach to make the transition smooth and successful.

• Greenfield Deployment or Migration to SharePoint Online

Connection offers deployment and migration services to SharePoint Online, bringing cloud native advantages to your collaboration platform.

• Hybrid Deployment or Migration

Deployment or migration to a hybrid SharePoint environment lets you access content in both on-premises and cloud environments. Hybrid also lets you take advantage of SharePoint Online functionality, which is not available on-premises. Connection offers hybrid deployment and Migration services for SharePoint Server 2016 and above with SharePoint Online.

• Microsoft Teams Deployment or Migration

Whether you are new to Teams, migrating from Skype for Business to Teams, or moving Teams from an existing tenant to a new tenant, Connection's deployment and migration services will ensure your success.
