

Microsoft Data Migration Services

Make Your Next Move an Easier One

Connection is your data migration expert for all facets of the data space, including planning, installation, architecture, design, analysis, project management, integration, and support. Our Data Migrations Services Team will work with your organization's stakeholders to plan, develop, and document an appropriate strategy for your next content migration project, as well as assist you with designing and deployment of the needed Microsoft 365 target resources using proven methodologies and best practices. We also offer flexible options that include fixed-fee project-based services and time-and-materials-based services.

Data Migration Services

• File Shares/Server to OneDrive for Business and/or SharePoint Online Migration

We can assist with the planning and migration from File Shares to OneDrive for Business or SharePoint Online. Connection analyzes your source content to ensure no issues will impact your migration, and will design the proper target Microsoft 365 resources. This can range from provisioning OneDrive for Business to designing and deploying a new SharePoint environment to meet your business content collaboration needs.

• Google Drive to OneDrive for Business and/or SharePoint Online Migration

Connection offers deployment and migration services for migrating Google Drive source content to OneDrive for Business or SharePoint Online. This brings the advantages and capabilities of Microsoft 365 collaboration services to your organization. Connection will assess your source content, develop the appropriate migration plan, and design and deploy the needed Microsoft 365 resources, ensuring a successful migration of your organization's content. We will also help you understand the capabilities of your new Microsoft 365 resources, enabling you to take full advantage of all of its collaboration capabilities.

• Tenant to Tenant (OneDrive for Business and/or SharePoint Online) Migration

Let us help you with migrating from one Microsoft 365 Tenant to another by assessing the source content and working with your organization to design and deploy needed target resources in support of a migration. Connection will be at your side throughout the planning, deployment, and migration phases to ensure the project's success.

In all migration scenarios, Connection offers services with attention to the correct level of planning based on a best-practice approach, making the transition to your target environment smooth and successful.

Contact an Account Manager for all of your migration needs.
